this book analyzes the impact of culture on employee justice judgments and reactions to perceptions of fairness and unfairness i start this book with the following two questions why is a book on culture and organizational justice needed what does such a book add to the extant literature on organizational justice especially after the publication of the landmark work of colquitt and greenberg 2005 handbook of organizational justice although there are no easy answers to these questions in the following lines i explain the reasons why a book on culture and justice is not only needed but also timely there are at least three reasons for which a book on culture and organizational justice is needed first a book on culture and organizational justice is needed because there are indications that culture exerts very important and wide ranging effects on justice behavior including even generally shaping the likelihood that individuals will experience feelings of injustice james 1993 p 22 second globalization has led to the interrelatedness of world economies thus most organizations not only operate in several countries but they also employ people from different nationalities and cultural backgrounds the resulting challenge is to find new ways of managing a culturally diverse workforce third justice is inherent to any organized social group as examples of social systems organizations are arenas of justice concerns because their members compete for limited resources the resources for

which they compete include tangibles such as money but also intangibles such as status power and prestige e.g. Tajfel (1978) and Turner (1985) in the following lines I elaborate on the three reasons why a book on culture and organizational justice is needed and timely

Bachelor thesis from the year 2017 in the subject business economics general grade 2.0 University of Tübingen International Business Language English Abstract This thesis explores the significance of organizational justice in international joint ventures (IJVs) from an organizational as well as a cultural perspective. The majority of studies on organizational justice were conducted within organizations and in a mono-cultural context. However, in the face of increasing globalization and growing popularity of IJV activities, the study of fairness in a cross-cultural context becomes more and more important. Therefore, this thesis seeks to bring organizational justice into relation with culture by using an IJV context and serve as a starting point for further research in this area. The three dimensions of justice: distributive, procedural, and interactional justice positively affect IJV performance through their distinct and interactive effects. In this setting, culture has a moderating influence on justice perceptions, which can be assessed through bringing justice perspectives together with Hofstede's cultural dimensions. Effects on fairness perceptions in different cultures can be outlined and contrasted. On this basis, implications for theoretical discussion and managerial practice in cross-cultural joint ventures can be derived. Together with further research, managers could use these findings to develop transcultural justice competencies to decide which of the new job applicants is the right one for the job vacancy. The human resource manager in Figure 1.1 gives everyone the same task to fulfil without regard to the personal qualities of the dog, seal, fish, elephant, penguin, monkey, and bird. He decides that everyone of them should climb that tree and compete against each other. From his perspective, this might be a fair procedure as he doesn't make exceptions and treats everyone equally. The monkey and bird might also be fine with the task and might not care about an unfair competition. The elephant and fish

however are very likely to perceive the situation as unjust and might voice complaints against the human resource manager as this example shows fairness often lies in the eye of the beholder and depends on everyone's individual perspective

this volume explores organizational justice focusing on relationships between authorities and employees it presents new theoretical perspectives and emphasizes leaders' views on justice the concluding chapter suggests a fifth wave in justice research examining justice as a dependent variable influenced by various factors

purpose this study aims to explore the influence of organizational justice distributive justice procedural justice and interactional justice on job performance task performance and contextual performance approach this research is a descriptive and analytical study survey data were drawn from different commercial banks located in Kathmandu Nepal findings the results indicated that there was significant relationship between perceived organizational justice and job performance the findings revealed that positive association between organizational justice and job performance implications this study argued that by addressing organizational justice or fairness concerns in management practices in a meaningful way would benefit organizations in terms of increasing employees' morale and job performance the findings and results of this study will be important implications for Nepalese managers in formulating appropriate strategies policies and procedures to enhance their employees' job performance it is also hoped that this study may help the top management of Nepalese organizations to enhance their performance management system and job performance level to a greater height

in today's world organizations are looking for new ways to maximize the productivity of employees and there is a strong idea that employees' productivity mainly depends upon their perception of organizational justice the present study explores the

this volume exp s our underst ing of organizational justice applies justice theories to develop models of ethical behavior in organizations it explores two themes exp ing models of organizational justice applying these theories to ethical unethical behavior addressing topics like greed dehumanization moral contracts

this book provides a unique account of how perceived justice is influenced by various aspects of an organizational merger and investigates the impact on behavior for those involved in the process drawing from both psychological and sociological

insights the author considers justice from an individual and group perspective in light of the political and strategic implications of mergers and acquisitions experiences from two empirical cases are used to consider the depth of theoretical analysis provided in terms of practical outcomes for both organizations and employees alike in this pioneering new book the author explores communication employee attitudes trust and commitment and the psychological contract between the employee and the organization emphasizing the importance of developing a new meaning of organizational culture although primarily aimed at an academic audience this book will also be useful to practitioners as it illuminates the potential pitfalls of overlooking the importance of fair treatment in the workplace

in the third section i tested the model and presented the findings results of hlm analysis show that 1 organizational justice perceived powerlessness and centralization exert direct effects on workplace deviance 2 organicity exerts direct effects on justice information salience 3 perceived powerlessness partially mediates the relationship between centralization and organizational deviance 4 information salience of procedural justice strengthens the effects of procedural justice on interpersonal deviance conclusions are drawn from the theory and findings highlighting implications for future workplace deviance and organizational behavior research keywords organizational justice workplace deviance organizational structure powerlessness information salience

purpose this study aims to examine the impact of organizational justice on organizational commitment and intention to stay in the organization of nepal approach this study is descriptive and analytical it is based on the effect of perceptions of distributive and procedural justice on commitment among the employees of different educational financial and professional organizations from kathmandu valley findings this study revealed a positive and significant relationship showing that the

foundation of an employee's commitment and retention is within the application of both distributive and procedural justice with procedural justice having stronger effect. Implication of the findings in this study would help managers and business organization in Nepal to formulate strategies that involved work factors such as distributive and procedural justice to improve the management of human resource development.
